Bitcoinnew Project Roadmap

Revolutionizing Bitcoin on the Solana Network
Last Updated: July 14, 2025

A project to transform decentralized finance with speed, security, and innovation.
Visit: bitcoinnew.org for more information.

Introduction

Our mission is to transform the future of decentralized finance by integrating the power of Bitcoin with the speed and scalability of the Solana blockchain. This roadmap outlines our journey to create an innovative, secure, and accessible ecosystem, powered by cutting-edge technology and community focus.

---

1. Q3 2025 – First Steps of the Revolution

1.1 Pre-Sale Phase 1

- Token Pre-Sale Launch: Official start of the $BTCN token pre-sale, opening doors to early visionary investors. Exclusive conditions to support the Bitcoinnew ecosystem.

- Awareness Campaign: Global campaigns in the "Join the Community" and "Why Bitcoinnew?" sections, including AMAs, online events, and partnerships with crypto influencers.

- Whitepaper & Tokenomics: Release of a detailed whitepaper explaining the project vision and tokenomics structure (distribution, utility, and governance).

- Initial Partnerships: Collaborations with Solana DeFi projects and DEXs to prepare for future $BTCN integration.

---

2. Q4 2025 – Ecosystem Expansion

2.1 Pre-Sale Phase 2

- Second Pre-Sale Phase: Expansion of the pre-sale to more participants, targeting international communities and institutional investors. Introduction of token bonuses.

- Beta Wallet Development: Release of the Bitcoinnew Wallet beta version for testing, with initial support for $BTCN and Solana wallet integration.

- Community Engagement: Expansion of Discord, Telegram, and social media channels, with gamification initiatives and rewards for active members.

- Initial Audits: Smart contract audits by specialized firms to ensure security and trust.

---

3. Q1 2026 – Final Chance for Investors

3.1 Pre-Sale Phase 3

- Third Pre-Sale Phase: Final opportunity for investors to participate before the public launch, maximizing fundraising.

- Ecosystem Testnet: Launch of a test network for $BTCN smart contracts, enabling experimentation with features like staking.

- Strategic Partnerships: Consolidation of partnerships with Solana DeFi platforms like Orca and Jupiter to ensure liquidity.

- Community Education: Tutorials and webinars under the FAQ section to educate users about the wallet and $BTCN benefits.

---

4. Q2 2026 – Preparing for Launch

4.1 Pre-Sale Phase 4

- Final Pre-Sale Phase: Conclusion of the pre-sale with special conditions, preparing for the official $BTCN launch.

- Global Marketing: Intensive campaigns on crypto platforms and physical events, highlighting "The Future is Bitcoinnew."

- Node Infrastructure: Development of tools for node monitoring (Node Status) for validators.

- Final Testing: Completion of testnet testing, focusing on scalability and performance.

---

5. Q3 2026 – Currency to Token Swap

5.1 Swap to Solana

- $BTCN Conversion: Execution of balance swaps to the $BTCN token on the Solana network, with transparent processes and technical support.

- Mainnet Launch: Activation of $BTCN on Solana's mainnet, enabling fast and low-cost transactions.

- DEX Integration: Initial listing of $BTCN on decentralized exchanges like Raydium and Orca.

- Airdrop Campaigns: Token distribution to the community, rewarding early supporters.

---

6. Q4 2026 – Staking Rewards & Security

6.1 Staking Platform

- Staking Launch: Introduction of the Bitcoinnew Staking platform, allowing users to lock $BTCN for rewards and network security.

- Validator Tools: Advanced tools for validators to monitor nodes via Node Status.

- Staking Education: Detailed guides and live support for setting up staking through the Bitcoinnew Wallet.

- Staking Pool Partnerships: Collaboration with providers like Marinade for flexible staking

options.

---

7. Q1 2027 – Liquidity Pool Trading

7.1 Liquidity Pools

- Liquidity Pool Creation: Establishment of $BTCN pools on DEXs, ensuring high liquidity and low volatility.

- AMM Integration: Partnerships with Automated Market Makers like Saber to optimize trading.

- Liquidity Incentives: Reward programs for liquidity providers.

- Marketing Expansion: Campaigns targeting traders, highlighting currency features.

---

8. Q2 2027 – Crypto Card with Cashback

8.1 Crypto Card

- $BTCN Card Launch: Introduction of the Crypto Card with cashback for spending $BTCN and earning token rewards.

- Merchant Partnerships: Collaboration with platforms like Solana Pay to accept $BTCN in stores.

- Mobile App: Launch of a mobile app to manage the card and track rewards.

- Adoption Campaigns: Promotions and giveaways to encourage card usage.

---

9. Q3 2027 – Ecosystem Wallet Hub

9.1 Official Wallet

- Bitcoinnew Wallet Launch: Release of the final wallet version, supporting $BTCN and DeFi integration.

- dApp Integration: Connection with Solana apps like Mango Markets.

- Advanced Security: Features like multi-factor authentication and key recovery.

- Multilingual Support: Wallet available in multiple languages.

---

10. Q4 2027 – Games & NFTs

10.1 Gaming & NFTs

- Game Launch: Blockchain-based games with $BTCN as the main currency.

- Tourist NFT Collection: NFTs with utility in the ecosystem, such as event access.

- Metaverse Integration: Partnerships with platforms like Star Atlas.

- Game Hackathons: Events for developers to create games and dApps using $BTCN.

---

11. Q1 2028 – Quantum Blockchain

11.1 Own Quantum Network

- Quantum Infrastructure: Launch of a proprietary quantum blockchain for security and speed.

- Partial Migration: Transition of $BTCN features to the new network, maintaining Solana compatibility.

- Scalability Testing: Experiments to support thousands of transactions per second.

- Academic Partnerships: Collaboration with quantum computing research institutions.

---

12. Q2 2028 – Quantum AI

12.1 Quantum AI Implementation

- Quantum AI Integration: Use of AI to optimize transactions, security, and real-time analytics.

- Wallet Personalization: AI-driven investment suggestions and strategies.

- Fraud Prevention: Quantum AI to detect malicious activities.

- AI Education: Educational materials in the FAQ section.

---

13. Q3 2028 – Quantum Trading Bots

13.1 Quantum Bots

- Quantum Bot Launch: Automated trading bots and DeFi strategies.

- DEX Integration: Connection with Orca and Jupiter to maximize profits.

- Accessibility: Simple interfaces in the Bitcoinnew Wallet to configure bots.

- Performance Testing: Monitoring for accuracy and low latency.

---

14. Q4 2028 – Quantum Contracts for Banks & Funds

14.1 Quantum Contract Network

- Quantum Smart Contracts: Infrastructure for banks and funds with maximum security.

- Institutional Partnerships: Integration of $BTCN into traditional financial systems.

- Enterprise Scalability: Adaptation of the quantum network for institutional demands.

- Decentralized Governance: Voting system for $BTCN holders.

---

15. Q1 2029 – Ecosystem Expansion

15.1 New Features

- New Integrations: With metaverses, new DeFi dApps, and loyalty programs.

- Global Expansion: Promoting $BTCN for payments and international remittances.

- Sustainability: Initiatives to reduce the environmental impact of the network.

- Community First: Global events and rewards, reinforcing "Join the Revolution."
